

“MONTAGEPLATTE”

A PRODUCT OF TECHNOLOGY AND INNOVATION

THE ADVANTAGES

of the “Montageplatte” 3-ply construction panel

ECO-SUSTAINABLE

thanks to short transport distances.
The quality wood, coming from the area,
is delivered directly to the plant.

QUALITY-PRICE RATIO

the high quality we are used to,
at a better price

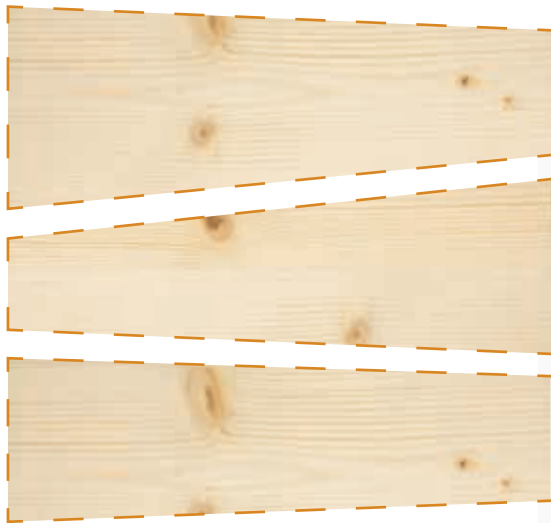

NATURAL SURFACE

The different width of the lamellas
results in a very natural surface.

THE SECRET OF SUCCESS

- High quality raw materials of local origin
- A most modern processing, thanks to technologies developed and implemented by Nordpan
- Long life
- Protects health and the environment
- Nordpan: a reliable partner for your business

A "MASTER STROKE" in the production of solid wood panels

The laths of the "Montageplatte" 3-ply construction panel are cut into a cone shape and glued together (see photograph above). By doing so, Nordpan gets a larger amount of wood and exploits this precious raw material in an optimal manner. The different widths of the laths obtained with the chip removal technique give the surface a very natural look. In this case Nordpan took the idea from our forefathers, implementing it with the use of super-advanced technologies developed by the company.

"Montageplatte" spruce

type of panels:
3-ply solid wood panel

Plank L&W:
3000x1250mm

Thickness:
19 mm – composition: 6/7/6 mm
27 mm – composition: 8.5/10/8.5 mm

Qualities:
B*/C = one side visual
C/C = both sides not visual

*cone shape

Cut to size: on request
Structure: edge glued continuous slats
Gluing: AW (ex AW 100) – SWP/2 (load bearing) – DIN 68705 – low emission (10+/-3)% when shipped ex works
Moisture:
Thickness tolerances: +/- 0.3mm
Packing quantities: 19mm = 25 pieces
27mm = 20 pieces

OFFICE AND PRODUCTION
